

AT-RISK FOR ELEMENTARY SCHOOL EDUCATORS

Workshop Discussion Guide

Print the following pages and use as a guide for leading the workshop.

Workshop Discussion Guide

Facilitator Prep time: 2-3 hours

Workshop Runtime: 2.5-4 hours

Preparation

✓ Determine how to best implement the training at your school:

Decision 1: Will staff complete the simulation prior to coming to the workshop?

- We recommend staff complete the simulation on their own and then meet for a 2.5 hour workshop.
- Alternatively, staff can take the simulation as part of the workshop (on separate computers). Then they rejoin the group for discussion. This would be a half-day training.

Decision 2: Will the workshop be face-to-face or online?

Tips for online workshops:

- Some software possibilities are Zoom, Google Hangouts, WebEx, or Skype.
- The “breakout rooms” in Zoom allow participants to partner for role plays and discussion.
- Share your screen to show PowerPoint slides.
- Assign a co-host to help you manage the workshop.
- Complete a recording of the online workshop and make it available for those who cannot attend.

✓ Review *At-Risk for Elementary School Educators* and the full Workshop Facilitator Guide and corresponding PowerPoint. Customize the PowerPoint to include your school’s or district’s logo and any mission- or vision-specific details. If you will have less than 2.5 hours for your workshop, customize it to suit your time constraints.

✓ Discuss your school’s referral process with the school leader, counselor, and/or mental-health team. Customize slides 15 and 16 (referral process and local resources) and be ready to present this information to the group. Be sure to include both the traditional at-school referral process as well as the process for referral and connection if students are learning from home. If you will provide mental health services via telehealth, explain that process.

✓ Cue up the corresponding workshop PowerPoint presentation and make sure you have adequate means to present it to your participants. If needed, you can adjust the length of time of your workshop by adding/removing discussion items or activities.

✓ Print or email the workshop handouts.

- Note-Taking Guide
- Simulation Summary
- Role-Play Scenarios
- Local Resources page from the simulation

Sample Planning Timeline

- **60 Days Prior:** Confirm simulation training date and location
- **45 Days Prior:** Ensure account access for district/school staff
- **30 Days Prior (if staff will take simulation prior to workshop):** Confirm registration and that attendees have created their accounts
- **5 Days Prior:** Send reminder to staff

Workshop Flow

Welcome & Hook Activity

10 min

Slide 1: Welcome

- Welcome attendees and thank them for coming.

Slide 2: Your role [customize]

- Introduce yourself and (if necessary) your role within the school or district.
- Share contact information. Encourage attendees to reach out to you with questions or follow up after the training.

Slide 3: Workshop overview [customize this slide if participants will not take the simulation during the workshop]

- Discuss what participants will learn in the workshop.

Slide 4: Group norms [customize as necessary]

- Sample norms: actively participate, be respectful, do not share names or identifying information of students or staff, seek help if you would like to discuss personal mental-health issues, take a break if any of the material is triggering, reach out to me at the end if you are concerned about a student.

Slide 5: Hook activity (5 min)

- Ask attendees to use a scrap piece of paper to describe the image on the slide, using the acronym AEIOU. (1 min)

A
E
I
O
U

Adjective: A word to describe the image.

Emotion: How do you feel about the image?

Interesting: What is interesting to you about the image?

OMG: What surprised you about the image?

Um?: What question do you have about the image?

- Ask participants to share their observations with a neighbor. (1 min)
- Ask participants to share a few answers with the whole group. (2.5 min)

- Quick Debrief: (0.5 min)
 - Sometimes we see the kid at the desk but we don't see the wave behind them. Understanding a student's mental health helps educators see the student's bigger picture.
 - As educators, we should know how to identify signs of mental-health distress, approach students confidently, and refer students to the support they need in order to succeed.

Note: *If staff have taken the Kognito simulation prior to the workshop (recommended), then skip to Discussion.*

Preparing for Simulation

Up to 10 min

Slides 6 - 9: Brief overview of Kognito and the simulation they are about to take

- Kognito's simulations are evidence-based.
- Encourage staff to choose the conversation pathway that best reflects what they would actually say in a real-life conversation.
- Let staff know we are not asking them to become counselors... but to capitalize on the limited time they have with students to provide the most effective support.

Simulation

1 hr

Slide 10

- Ensure participants are able to login to their account.
- Provide headphones to all participants.
- Pass out the note-taking handout to all participants.
- Proctor the room to allow anyone needing assistance to communicate with you.
- Participants who finish early can begin their break. Write on the board what time the workshop will reconvene for discussion.

20-Minute Break

Discussion

35 min

Slide 11: Simulation review (5 min)

- Pass out the Simulation Summary.
- Remind participants about the conversations in the simulation (include more detail if the participants took the simulation prior to the workshop).
- Ask a few questions to get the discussion going. Sample questions:
 - How similar did these feel to conversations you've had in real life?
 - Did you try new things in these conversations that you haven't tried in real life?

Slide 12: Warning signs (10 min)

- “Remember the wave we saw in the picture at the beginning of the workshop? Often we don’t know that wave is there. All we see are the student’s reactions to that wave. These are warning signs that tell you a child might be dealing with more under the surface than we realize.”
- Possible discussion questions:
 - What kinds of things do kids your students’ age struggle with emotionally? (Possible answers: managing school work, responsibilities at home, relationship stuff, parents fighting, divorced parents, mental disorders)
 - How do young people typically cope with these kinds of struggles? (Possible answers: they don’t, they shut down, maybe they don’t do their work, they talk to an adult who can help)
 - Were there any signs that surprised you, or that you hadn’t thought to take note of before playing through the simulation?
 - Why is it important for teachers to notice these things, reach out to the student or their caregiver, and possibly refer them for support? (Possible answers: educators in an ideal position to notice when a student needs help and connect them with the resources designed to help them; the earlier a child gets the help they need, the better their overall outcomes might be; students receiving needed support may take less of our time and attention in the classroom and cause less disruption)
 - Why do some students’ warning signs not lead to approach and referral by a teacher? (Possible answers: teachers may not realize the behavior is indicative of a deeper issue; or the student’s behavior may not be a problem in the classroom)
 - How might identifying an at-risk student save you time in the long run? (Possible answers: the student could get the help they need to improve behavior in the long run; when you improve your relationship with the child, their behavior may also improve)

Slide 13: Bringing up concerns (10 min)

- Review the “EASING” techniques.

E Check your own **Emotions**
A Ask for permission
S Be **Specific**
I Use “**I**” statements
N Keep it **Neutral**
G Show **Genuine** curiosity

- “Using these techniques encourages a student or parent to share and creates a more open environment for discussion to avoid the other person becoming defensive and refusing to communicate.”
- Possible discussion questions:
 - Which of these techniques do you already use when talking to students/caregivers? How are they helpful?
 - Which of these are new techniques you want to try in the future? Why?
 - How did you do in the conversation with Ms. Parker, Mia’s mother? Did anything surprise you about this approach for discussing your concerns with a parent?

- If you have had concerns about one or more of your students in the past and have initiated conversations similar to this one with Ms. Parker, what worked well for you?

Slide 14: Listening actively (10 min)

- Review the techniques learned for being a supportive, active listener.
 - Ask open-ended questions
 - Reflect
 - Avoid criticizing, giving advice, disagreeing
- Possible discussion questions:
 - What words/tone do we often use when we're approaching a student as an authority figure? (Possible answers: "you should/shouldn't," jumping to discipline, acting like we already know the reason the child is behaving the way they are)
 - How do we change our tone when we're approaching a child as a supportive adult? (Possible answers: ask questions and be genuinely interested in their answers, go into the discussion without preconceived ideas for what's causing the behavior, ask questions and reflect, use a supportive tone)
 - How do we know when to use one tone or another? (Possible answers: consider if the issue is a warning sign for psychological distress, if the student's behavior has changed recently, if the behavior is out of character)
 - What were some effective and ineffective things you said to Derrick? How did he react? (these should mostly be examples of the techniques on the slide)
 - How can these techniques for active listening put you in a better position for collaborative problem-solving? Why is that important? (Possible answer: the student feels heard and respected / like an equal partner in the conversation and is, therefore, more likely to listen to concerns and brainstorm solutions with you)
 - If you have had concerns about one or more of your students in the past and have initiated conversations similar to this one with Derrick, what worked well for you?

Role Play 1

30 min

Prepare for role play (5 min)

- Ask participants to break into groups of two for a set of role plays. Online-meeting systems like Zoom offer randomized break-out rooms for set periods of time and set group sizes.
- Tell participants they will role-play a challenging conversation between a teacher and a guardian and then between a teacher and a student.
- Ask them to decide who will play the teacher first.

Role play (10 min)

- Participants should look at the Role Play Handout and read ONLY about their character (the concerned teacher or the guardian). Then they begin their first role play.
- Keep up Slide 13 (the list of the EASING techniques).
- Give participants a one-minute warning before the end of the role play.

Role play discussion (15 min)

- If you played the role of the teacher... Raise your hand if you tried anything new in this conversation (anything you haven't tried in the past in discussions with parents)? What did you try and how did it work or not work? What did you learn about Tamina's home life?
- If you played the role of the guardian... What did your partner do in this conversation to make you feel comfortable and respected? What did you learn about Tamina's behavior at school?
- How did this conversation improve both the teacher and the parent's ability to help Tamina? (Possible answer: now the teacher and parent can work as a team, communicating and coordinating their approach to helping Tamina)
- How were EASING techniques or active-listening techniques used in your conversation? Or how could they have been used to make the conversation even better? (can move between slides 13 and 14)
- What kind of advance planning, if any, is necessary for conducting a conversation like this? (Possible answers: checking your emotions to put aside any unhelpful thoughts or presumptions you may have about the student or parent; considering how you might bring up the things you've noticed and what kind of language you will use)
- Could Tamina be helped by a referral to a school mental-health professional? (Yes, Tamina seems to be under a lot of stress and may benefit from talking with a trained professional at school.)

15-Minute Break

Role Play 2

25 min

Role play (10 min)

- Now participants will switch roles. Whoever played the teacher before will now play the student.
- Ask participants to read Section B on the Role Play Handout and begin their second role play.
- Keep up Slide 14 (active-listening techniques).
- Give participants a one-minute warning before the end of the role play.

Role play discussion (15 min)

- If you played the role of the teacher... Raise your hand if you tried anything new in this conversation? What did you try and how did it work or not work? What did you learn about Dallas's emotional state?
- If you played the student... What did your partner do in this conversation to make you feel comfortable and respected?
- How were the EASING and active-listening techniques used in your conversation? Or how could they have been used to make the conversation even better? (can move between slides 13 and 14)
- What might be the main challenges to using these techniques in real life? How might you overcome them?
- Could Dallas be helped by a referral to a school mental-health professional? (Yes, Dallas seems to be under a lot of stress and may benefit from talking with a trained professional at school; it would also be helpful to talk with his parents about your observations.)

Referral Process

10 min

Slides 15-16: Referring at-risk students

- Ask participants to turn to the back of the Simulation Summary and take notes.
- Pass out copies of the "Local Resources" page from the simulation. These are resources that will have been provided by the agency sponsoring your access to the simulation.
- Go over the information on your customized referral-process and local-resources slides (slides 15 and 16).

Conclusion Activities

20 min

Slides 17: 3, 2, 1 Activity (8 min)

- On a new piece of paper, write down 3 things you learned today, 2 questions you have, and 1 way you're going to change your practice.
- Allow participants to share their answers.

Slide 18: Bridging the Gap Activity (12 min)

- "Let's do some action planning, to think about your school and commit to some takeaways. Visualize where you are, where you'd like to be, and what it takes to get there."
- **01.** Where You Are: List some of your observations.
- **02.** Where You'd Like to Be: List some of the qualities of your ideal school.
- **03.** What It Takes: Finally, list some ideas that might bridge the gap between where you are and where you'd like to be. What could happen to bring your school one step closer to your ideal?
- Allow participants to share their ideas.

Slide 18: Conclusion

- Thank participants for their time and remind them of why this topic is important.
- Allow for questions.

Print the following pages
and distribute to workshop
participants.

AT-RISK FOR ELEMENTARY SCHOOL EDUCATORS

Simulation Summary

Print the following handout and distribute to workshop participants.

Simulation Summary

Identifying At-Risk Students

When identifying students who may be in distress, look for **significant changes in behavior** and look for **behaviors that seem extreme**. Trust your Instincts. Below are some common warning signs of distress.

Signs of Distress

- 01. **Behavioral changes**, like trouble concentrating, withdrawal and isolation, lack of energy, physical complaints, and self-destructive behaviors.
- 02. **Emotional changes**, like irritability, aggression, anger, emotional outbursts, being nervous or easily startled, clingy, low self-esteem and negative self-talk, sadness, guilt, shame, or fear.
- 03. **Academic changes**, like refusal to comply with rules and requests, impulsive choices, decline in academic performance, extreme nervousness around academics or excessive worry about getting everything right, and frequent absences from school.
- 04. **Appearance changes**, like disheveled or worsening appearance, lack of cleanliness, gaining or losing a lot of weight, and appearing very tired.

Listening Actively

Do

- ✓ Ask open-ended questions
- ✓ Reflect

Don't

- ✗ Criticize
- ✗ Give advice
- ✗ Disagree

Simulation Summary

Q. To whom should you refer a student who may be in psychological distress?

Q. What is the referral policy in your school for students who may be a danger to themselves or others?

Q. When and how would a student's parents/guardians be notified about your concerns? Whose role is it to notify them?

AT-RISK FOR ELEMENTARY SCHOOL EDUCATORS

Role-Play Scenarios

Print the following handout and distribute to workshop participants.

Role-Play Scenarios

Role-Play Scenario A

Concerned Teacher

Read this if you are playing the teacher role.

During the first half of the school year, your student Tamina did well, making mostly Bs and Cs, and seemed happy and outgoing. She was popular and often told jokes in class that made the students (and you) laugh. However, since the winter break, there's been a change in her. She often comes to school in clothing that seems stained and dirty. You've noticed her sometimes smelling of body odor. She's become more quiet and withdrawn. Now, instead of laughing with her friends, she's more likely to say things that hurt their feelings—in class or out. Last week, she made a girl in class cry when she made fun of her reading and told her she was stupid. You're concerned about Tamina's change in behavior and want to reach out to her parent to talk things over.

Guardian

Read this if you are playing the guardian role.

Tamina is your third of four children, who you are raising mostly on your own. Your mother used to help out with cooking and cleaning, especially on the nights when you have to work the evening shift. But, right after the holidays, your mother had a stroke. Now she spends most of her time in bed, and you're feeling the strain of constant work and childcare. Often, you leave your oldest child, Amira, in charge of the younger ones. You've noticed that sometimes Amira bullies and yells at the others, but you don't stop her because you need the help. It's hard to keep up with how all the kids are doing at school; but, as far as you know, Tamina is doing fine. She always hugs you tight when she sees you and has a big smile. She is one of the real joys in your life.

Role-Play Scenarios

Role-Play Scenario **B**

Concerned Teacher

Read this if you are playing the teacher role.

Dallas is in 2nd grade. Earlier this year, his parents divorced. Now you have to monitor who picks him up on what days. Twice, the father accused you of allowing Dallas to be sent home with the mother on the wrong day, which leads you to believe the custody agreement may be complicated and antagonistic. Mondays through Wednesdays he comes to school looking tired. He rests his head on the desk and falls asleep. Sometimes he asks to stay inside and nap instead of go to recess. On Thursdays and Fridays, he seems happy--more like his old self. You want to check in with him and see how things are going.

Dallas

Read this if you are playing the student role.

Last summer, your parents split up. Your dad went to live in an apartment on the other side of town, while you and your sister stayed with your mom in the house. Mom and dad fought a lot before dad moved out. Now they fight even more—on the phone, in person, and through you. They often tell you bad things about each other. Your dad says your mom is a drunk. Your mom says your dad is a cheater. You're not sure what all that means, but you know it's bad. Lately it's been a lot more fun to stay at your dad's house, Wednesday through Friday nights. Dad plays with you and your sister, you watch movies, he makes good food, and he gets you to school on time. The other days, when you're with your mom, it's pretty tough. Mom lies around on the couch a lot, playing on her phone and watching TV. When you or your sister get too loud, she yells. She lets you watch TV at night while she works in the other room, so you and your sister stay up late. On those nights you're really tired for school the next day. You wish things could just go back to normal.

Stay Connected

Congratulations! You have completed ***Emotional and Mental Wellness and Trauma-Informed Practice*** training.

We invite you to be part of the Kognito community online and connect with us on social media. Share your experience using Kognito, hear from experts, stay in the know about new products and be the first to hear about conferences and online events.
